

UPSTREAM OIL AND GAS

Executive Summary

Business Challenge

Fast growing and dynamic small and medium-sized upstream oil and gas companies deal with a new level of operational management challenges—often not supported by their existing IT systems. Given their size and the resources required delivering quality products and services, upstream oil and gas IT managers tend to believe that their companies would not be able to afford an implementation of a fully-fledged enterprise management system like SAP®.

“ Illumiti delivered outstanding, integrated AFE (project tracking) and financial management functionality that helps us control costs, produce accurate reports and manage operational information in real-time. The system was implemented by Illumiti on time and within the allocated budget, enabling Laricina Energy to support its growth with a minimal increase in admin staff.

STUART GIBSON
Manager, Operational Accounting, Laricina Energy Ltd.

SAP® Business All-in-One, Quickly and at a Surprisingly Affordable Price

Illumiti couples its exceptional SAP® implementation track record with SAP's industry best practices to offer oil and gas companies a SAP® Business All-in-One solution delivered at an exceptionally fast pace. Best-practices embodied in Illumiti's solution for oil and gas companies support business process requirements across Financials, Joint Venture Management, Procurement, Maintenance, Capital Projects, Fixed Assets and Business Intelligence.

You're in Good Company

The majority of the leading oil and gas companies are long-term SAP® customers. This is now possible for small and mid-sized companies too, with potential annual benefits several times higher than implementation costs!

“ **Illumiti leverages its fine-tuned methodology and exceptional SAP implementation track record to make the wealth of experience accumulated by SAP across numerous oil and gas companies work for you.**

Illumiti's Oil & Gas Solution Overview

SAP® provides a complete set of integrated functionality that addresses the typical issues faced by oil and gas companies in managing their business. Illumiti's solution for oil and gas companies leverages the SAP® Business All-in-One product and is designed to facilitate rapid implementation of the software for small and medium sized upstream oil and gas companies.

The solution enables Illumiti's clients to:

- Leverage pre-configured processes, best practices and upstream oil and gas industry expertise;
- Review pertinent processes quickly, identify gaps, and implement delta requirements;
- Utilize business intelligence dashboards in addition to financial and operational reports; and
- Benefit from significantly reduced implementation costs and timelines.

The solution's pre-configured processes address key functional requirements that are pertinent to oil and gas companies. These are summarized in the box to the right.

SAP® and Illumiti Deliver the Most Cost-Effective Route to Optimized Upstream Oil and Gas

Financials

- Multi-ledger reporting capabilities meeting local requirements like IFRS in multiple currencies
- Capital cost data for equipment and construction projects
- Simple budgeting / planning process and comparative reporting across departments
- Fixed Assets – multiple depreciation methods support oil and gas relevant requirements
- Comprehensive audit controls meeting various compliance requirements such as SOX

Capital Projects

- Management of construction of well sites, gas plants, oil battery's and pipelines.
- Effective management of AFE's and project driven development
